PROFESSIONAL SUMMARY

Results-driven AI / ML Engineer with practical experience in machine learning, deep learning, and generative AI. Skilled in designing, training, and deploying production-ready models for NLP, computer vision, and autonomous multi-agent systems. Proficient in Python, PyTorch, TensorFlow, LangChain, and Hugging Face. Experienced in prompt engineering, model optimization, and cloud-based deployment (AWS / Azure / GCP). Recognized at national innovation events for building scalable, data-driven AI solutions that align with business goals.

TECHNICAL SKILLS

Programming Languages: Python

Frameworks & Libraries: PyTorch, TensorFlow, Keras, Hugging Face, LangChain, Scikit-learn, OpenCV

AI Domains: Generative AI, LLMs, Prompt Engineering, NLP, Computer Vision, RAG, Multi-Agent Systems

Data & Analytics: Pandas, NumPy, EDA, Feature Engineering, Model Validation

Visualization: Matplotlib, Seaborn, Plotly, Power BI

MLOps & Deployment: FastAPI, Flask, Streamlit, MLflow, Docker, AWS, GCP, Azure

Databases & Vector Stores: MySQL, SQLite, FAISS, Pinecone

PROFESSIONAL EXPERIENCE

Artificial Intelligence Intern — Placemantra

Jan 2025 – Mar 2025

- Performed data preprocessing, feature engineering, and EDA for text-classification and NLP models.
- Developed and fine-tuned ML / DL models in PyTorch / TensorFlow, improving accuracy by 12%.
- Deployed optimized inference pipelines via FastAPI + Docker, reducing latency 46%.
- Implemented MLflow to manage experiments and ensure reproducible model training.

PROJECTS

EDUVERSE AI – Agentic AI Education Platform

Tools: Python, FastAPI, React, Gemini API, DeepSeek API, JWT, Docker

Description: Built a full-stack Agentic AI education platform with a multi-agent control system for personalized learning and automated evaluation. Implemented adaptive content delivery using advanced LLM models.

Responsibilities:

- Designed multi-agent architecture for profiling, learning, evaluation, and certification
- Implemented personalized learning roadmaps using Gemini & DeepSeek models
- Developed React frontend with FastAPI backend secured using JWT
- Containerized the application using Docker for scalable deployment

PROACT-SAFE – Intelligent Real-Time Firearm Threat Monitoring System

Tools: Python 3.11, YOLOv8 (Ultralytics), OpenCV, Streamlit, COCO/Open Images Dataset.

Description: Built a real-time firearm detection system using YOLOv8 with temporal validation to reduce false alerts. Designed intelligent threat scoring and event-based alert generation for smart surveillance.

Responsibilities:

- Trained and optimized YOLOv8 detection model
- Implemented ≥ 5 -frame temporal filtering logic
- Designed weighted threat scoring mechanism
- Developed real-time monitoring dashboard
- Evaluated performance using Precision & Recall

EDUCATION

Jawaharlal Nehru Technological University Hyderabad (JNTUH)

Nov 2022 – May 2026

B. Tech in Computer Science & Engineering (AI & ML)

ACHIEVEMENTS & CERTIFICATIONS

- Finalist** — TASK Code Unnati Innovation Marathon (SAP & Edunet, 2025)
- Oracle Cloud Infrastructure 2025 Certified Data Science Professional
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Certified in Emerging Technologies — SAP & Edunet (2025)
